

ESPÍRITU SANTO ISLAND SCUBA

ARCHIPELAGO DAY TRIP

In the warm, crystal-clear waters just minutes from La Paz lies one of the most intact ecosystems in the world. Declared a UNESCO World Heritage Site, the crown jewel of the Sea of Cortez, Espiritu Santo Island Archipelago boasts 500 species of fish, unique plants and diverse wildlife. One-third of all the world's whale and dolphin species either live or migrate here including the year-round resident fin whale.

Los Islotes is home to an important rookery of some 400 resident sea lions, *Zalophus californianus*. Snorkel with curious pups that swim straight at you only to zoom away in a froth of bubbles, tugging on your fins when you least expect it. Observe dynamic schools of uncountable colorful fish, magnificent sea turtles, breaching *Mobula* rays and the occasional Humpback.

Welcome to your ideal Baja Ex/perience. Gratifying and unforgettable. Dive El Bajo, Salvatierra, Swanee Reef and Los Islotes with us. [Click for dive site details!](#)

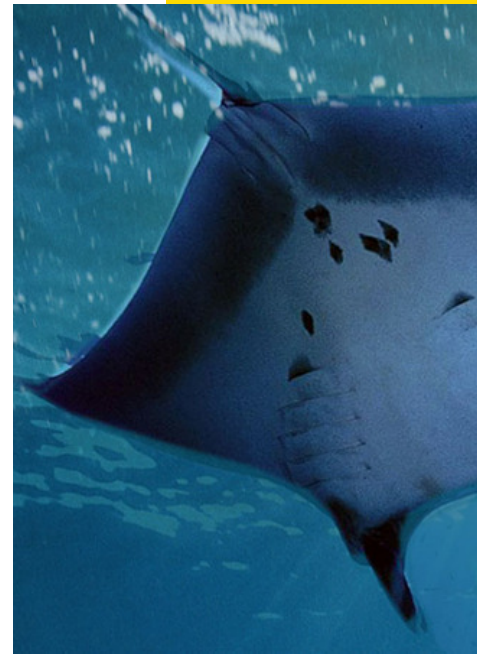

THE IDEAL BAJA EX/PERIENCE
